#bugbountytip The most vulnerable place in  
Wordpress/Drupal is a custom themes and plugins.  
Wordpress Location: /wp-content/themes/ and /wp-  
content/plugins/ You can found their name with  
Waybackarchive or site map in Burp.

The easiest P1 ever!! 😁😁 Steps to Reproduce:  
Navigated to <https://t.co/CEADFzHYUD> Directory Bruteforcing found "admin" Bruteforcing into it found "users.db" Exposing admin's creds in plaintext! Logging in to the Admin Panel. #BugBounty #bugbountytip

Just reported RCE to a program on @Hacker0x01. Wish me the best of luck. #infosec #bugbounty #bugbountytip Kind of nervous because of an accidental reboot that occurred while I was testing for a PoC.

I was logged in a program's portal! 🚫 Suddenly I have visited this URL! 😞  
[https://\\*.redacted.com/user/profile/delete](https://*.redacted.com/user/profile/delete) and GUESS what? My account got deleted without any confirmation! 🚫 #bugbountytip #bugbounty
